#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brandon (US 3,116,835) in view of Applicant's Admitted Prior Art (hereafter AAPA).

Brandon discloses the invention substantially as claimed except for the steps of feeding a plurality of boards past a sensing station on a conveyor, sensing the length of each of the boards, determining whether a selected board will be sawn and the location at which the board will be sawn based upon the sensed length, and sawing the boards at the location. AAPA teaches that the use of sensor to determine shape properties, and controller for determining whether the board can either pass under saws without being cut or to be cut at a predetermined location is old and well known in the art. It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the steps of sawing the boards using the sensor, controller, and saw as taught by AAPA with the sorting device of Brandon in order to provide a method of using an automated sawing and classifying system that is simpler and more efficient. With respect to claims 6-7, it is noted that the controller of the modified device of Brandon will be capable of controlling the sorting sequence such that selected boards are placed in either first or second plurality of bins of Brandon.

Art Unit: 3724

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Williams, Kramer, Bovay, Jr., et al., Haumann, Lawson, Tarrant, Heikinheimo '952, '297, Jacobsen, Hellstrom et al., Faley et al., Moore, Hellgren et al., Brough et al., and Kruit et al. are cited to show related devices.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 703-306-4523. The examiner can normally be reached on Monday-Friday 9:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-2187. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
